- Over 50 order types and algorithms available
- OMF is regulated by NZX and the Financial Markets Authority

Features of OMF MarketTrader

Direct market access to equities, ETFs/ETNs, options, CFDs and futures

OMF MarketTrader provides direct access to equity markets around the world. Trade listed equities, ETFs/ETNs, options, CFDs and futures in multiple currencies all from the one account.

Instant execution of trades in over 100 exchanges across 23 countries

The (SMART) function scans multiple exchanges to obtain the best price in the market. One click trading allows orders to be routed directly to the exchange to ensure lightning fast execution and accurate pricing.

Low brokerage to trade international shares

OMF allows you to trade shares in some of the world's biggest companies without paying excessive brokerage fees. Our brokerage commission is transparent and competitive, so that you can keep your trading costs to a minimum. All fees are limited to commission on buy/sell transactions only and there are no annual account fees or dividend commissions.

Mosaic - A fully customisable workspace

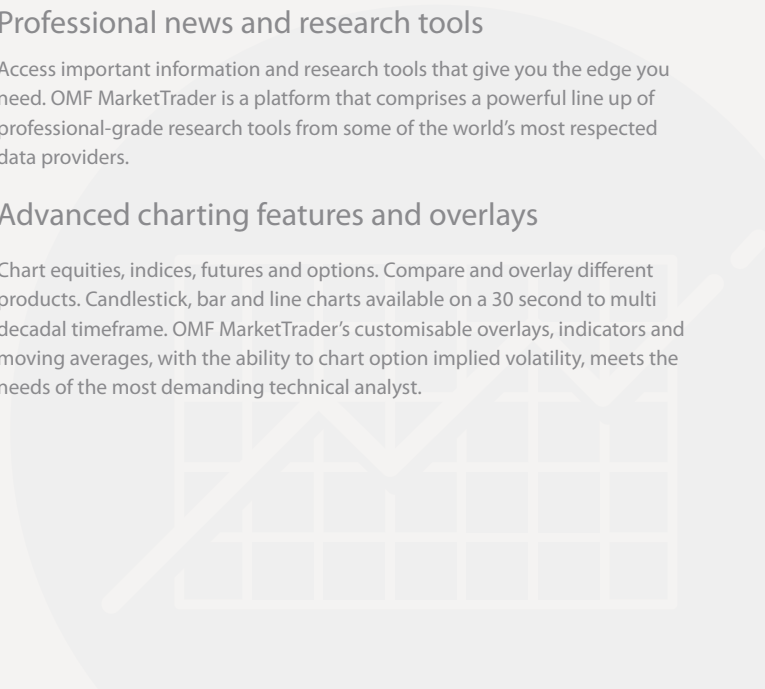

OMF MarketTrader optimises your trading in a single, customisable trading and information workspace. The Mosaic workspace provides intuitive out-of-the-box usability and is easily modified to suit individual requirements. Whether you are a fundamental investor focused on research and breaking news, or are more interested in charting and technical aspects of the market, Mosaic has the flexibility to suit your needs.

Professional news and research tools

Access important information and research tools that give you the edge you need. OMF MarketTrader is a platform that comprises a powerful line up of professional-grade research tools from some of the world's most respected data providers.

Advanced charting features and overlays

Chart equities, indices, futures and options. Compare and overlay different products. Candlestick, bar and line charts available on a 30 second to multi decadal timeframe. OMF MarketTrader's customisable overlays, indicators and moving averages, with the ability to chart option implied volatility, meets the needs of the most demanding technical analyst.

Features of OMF MarketTrader

Real time risk management

Real-time monitoring systems help you understand and manage your own trading risk at any time of the day so that you can react quickly to market movement. Our online margin calculators can be used prior to placing trades to ensure you don't exceed your liquidity requirements.

Comprehensive reporting with customisable statements

Customisable statements provide detail on all your trading activity and can be viewed as downloadable PDFs or in HTML format. Our online reporting and analysis interface lets you analyse the performance of your portfolio online by creating and saving PDF reports based on a set of measurement criteria.

24 hour dealing desk to provide advice and trading support in New Zealand

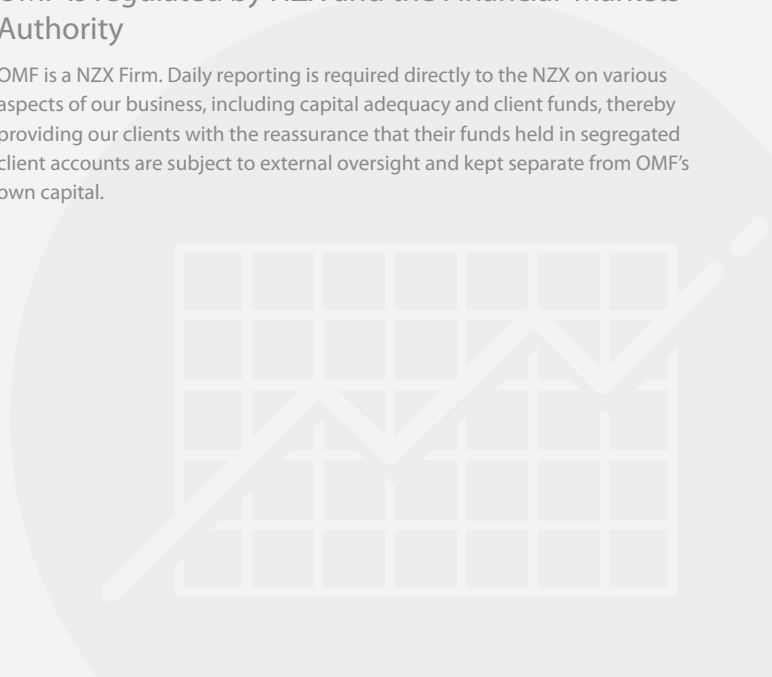

Our team of experienced dealers are available 24 hours from 7.30am Monday morning until the close of markets on Saturday morning, to provide support, informed fundamental and technical analysis and make recommendations based on market knowledge and insight.

Over 50 order types and algorithms available

For advanced traders, the option strategy lab allows you to compare scenarios based on your perception of future market conditions. OMF MarketTrader supports over 50 order types and algorithms that may help limit risk, provide price improvement, allow privacy, time the market and simplify the trading process.

OMF is regulated by NZX and the Financial Markets Authority

OMF is a NZX Firm. Daily reporting is required directly to the NZX on various aspects of our business, including capital adequacy and client funds, thereby providing our clients with the reassurance that their funds held in segregated client accounts are subject to external oversight and kept separate from OMF's own capital.

OMF MarketTrader Products

Equities & Futures

- Buy and sell equities on global stock and futures exchanges, including the ASX, NASDAQ and NYSE
- Ability to trade with unsettled funds
- Utilise margin share trading for high value portfolios
- Real time margining – track your portfolio value and risk

Options

- Limited risk, unlimited return on bought options
- Ability to profit from higher, lower or sideways moving share prices
- Significant leverage achievable
- Hedge downside risk with put options
- Add income by selling call options against your shareholding

Contracts for Difference (CFDs)

- Go long or short – profit from higher or lower share prices
- High leverage - as little as 10% initial margin deposit required
- Lower effective brokerage than transacting in physical shares
- Dividends paid on the face value of long CFDs
- CFDs convey the benefits of margin share trading without the need to maintain a high value portfolio margin account

Exchange Traded Funds (ETFs)

- ETFs give investors exposure to thousands of global assets including commodities, currencies, bonds, indices and volatility products
- Buy and sell ETFs on margin, or by using CFDs and options
- Leveraged ETFs are available with up to 3 times the exposure to an asset

Open an OMF MarketTrader account

Opening an OMF MarketTrader account is easy

A simple application process ensures that you can start trading without delay.

1. Complete and submit the client application form (including identification form & W8BEN form).
2. OMF will confirm that your account has been approved and ready to receive deposits.
3. Once your account has been opened, one of our experienced Equities Dealers will contact you to arrange a demonstration. You will also gain access to a range of market reports, daily commentaries and announcements so that you can stay fully informed of market movements.
4. Once your account has been funded, log in to your OMF MarketTrader platform to commence trading.

Who is behind OMF MarketTrader?

OMF is a NZ owned and operated brokerage firm, with a strong and established reputation in the financial markets. OMF advises and facilitates trades in a full range of financial products available in the FX, carbon, options, equities, CFDs and futures markets. Operating in these highly competitive and regulated financial markets requires experience, integrity and superior levels of service.

In addition to providing a phone based service, OMF have an emerging offering of online trading and execution platforms.

OMF is a NZX Firm and regulated by both NZX and the Financial Markets Authority.

Our experienced professionals have been successfully navigating our clients through the financial markets by delivering honest and expert advice since 1987.
